## Mouse IgG1, FITC conjugated

## Isotype Control

| Description:         | mouse IgG1, FITC conjugated   |
|----------------------|---|
| Catalog Number :     | C03-11001   |
| Quantity size :      | 50T(50ug/1ml)   |
| Storage Buffer:      | 0.01M PBS(pH7.4) with 0.03% Proclin300.   |
| Purification Method: | Purified by Protein-G affinity chromatography.  |
| Usage:               | The reagent is intended as isotype control for flow cytometry analysis to establish the amount of non-specific antibody binding. For your particular experiment, use the same concentration of this isotype control antibody as the recommended working concentration of the antigen-specific antibody. Also, when working with prediluted antibodies, dilute the isotype control to the same concentration as is the concentration of the antigen-specific antibody. If under particular experimental conditions the background signal of the isotype control is too high (usually when working concentrations of used antibodies are above 10 $\mu$ g per ml of incubation mixture), change the conditions of your experiment to reduce the background. |
| Key Applications:    | <ul> <li>FCM: 20ul/test</li> <li>protect from light</li> </ul>  |
| Antibody Category:   | Secondary & Control Antibodies  |
| Storage:             | Store at 2-8°C for one year. Avoid repeated freeze/thaw cycles.   |
| Important Note:      | This product as supplied is intended for research use only, not for use in human, therapeutic or diagnostic applications.   |
